

## Private Residence Marble Arch London

### Curtis Wood Architects

A full refurbishment of the basement, ground floor and first floor including the installation of a bespoke glass extension with a 'walk on' glass roof.

The project included the construction of three bathrooms, two bedrooms, utility room, kitchen, external space and refurbishment of existing conservatory and dining room.

Underfloor heating was installed throughout as well as a full re-wire, re-plumb and new boiler. Bespoke fitted wardrobes, a combination of limestone and slate tiles, Wenge floors and opaque sliding doors, this really was a 'top end' project!.
